

Oktopus

Linde Werdelin's newest addition to the Oktopus family is the **Oktopus Moonphase complication**. Powered by a Frederic Piguet movement and with a moonphase complication built by Svend Andersen, this is a unique combination of design and craftsmanship which depicts the moon phases with photorealistic luminous discs and gives a time indication for the next half or full moon.

Having the same case dimensions as the rest of the Oktopus watches, the Moonphase model bears a sapphire crystal case back revealing the beautifully crafted Piguet movement. The water resistance has been tested to withstand the pressure of 888m and the integrated helium escape valve at 9 o'clock ensures the watch endures the pressure during resurface time.

The Oktopus Moonphase is available in titanium with rose gold bezel and limited to 29 pieces, connoting the 29 days before the next full moon.

Technical specifications

Oktopus Moonphase - Limited to 29 pieces

Size	• 46mm (w) by 49mm (l) by 14mm (h)
Movement	<ul style="list-style-type: none"> • Automatic mechanical Frederic Piguet movement calibre 1150, Linde Werdelin & Andersen Geneve personalised oscillator • 72 hour power reserve • 28 jewels • 28,800 bpm • Moonphase complication by Svend Andersen with luminous photorealistic moon phases and moonphase time indication
Case	<ul style="list-style-type: none"> • Titanium gr. 5, microbille finish • Screw on case-back with sapphire crystal • Rose gold unidirectional turning bezel with 10 minute markings & Super Luminova marker at 12 o'clock • 3.8mm anti-reflective sapphire crystal • Screw in crown with LW logo • Helium escape valve at 9 o'clock
Dial	<ul style="list-style-type: none"> • Black matt dial • Arabic numerals rose gold plated applied indexes with Super Luminova
Hands	• Rose gold plated, diamond cut rhodium plated with applied Super Luminova
Water resistance	• 888m
