

The One / 3Timer

Based on the One model, the Hard Black DLC II features a colour contrast of bright yellow luminous hour markers and yellow strap stitching against the all black finish of the case.

The model's case is microbille finished before it is blasted with around one thousandth of a millimetre of carbon to create a surface up to three times harder than steel and second only to diamond in hardness. This hydrogen free diamond structure crafts the watch in such a way that it guarantees extreme durability and virtual scratch and corrosion resistance.

Both **The One** and **3-Timer** models have toned-down features which keep their design minimalist, functional and easy to read.

Technical specifications

Hard Black DLC II - Limited to 88 pieces

Size	• 46 mm (w) by 49 mm (l) by 12 mm (h)
Movement	• ETA 2892 – A2 mechanical automatic • 42 hour power reserve
Case	• Stainless steel with black DLC coating 5000 HV hydrogen free diamond structure • Microbille matt finish • Anodised aluminium screw-down case back cover matching dial colour • Unidirectional turning bezel with luminous markers • Screw on case-back • 2.2 mm anti-reflective sapphire crystal • Screw in crown with LW logo
Date	• At 4 o'clock
